

We (my family) have enjoyed peaceful nights sense the no call list has been up and running. Before we would get phone calls all hours of the evenings super time, quit time and even at bed time. This was very trouble sum, we even pay the phone company extra money for a service to help control my phone. Which I find ironic, beings it is to be a personnal phone number, and these companies are solicting buninness, do they welcome personnal phone calls on thier company time. Please do not allow C.B.A. to change the Indiana privace law, my phone is my privilege I say this with confidence in America as a Vetran of this country, thank you.
